Kevin Kurian | Curriculum Vitae

Computer Science PhD Student, UF | Gainesville, Florida
kuriankevin@ufl.edu | +1 (904) 990-7171 | LinkedIn | Google Scholar

RESEARCH INTERESTS

Multi-Agent LLMs & Systems, Explainable AI, Game Theory, Adversarial ML, LLM Security

EDUCATION

University of Florida(UF) | Gainesville, Florida — August 2025 - Present
PhD in Computer Science | Advisor: Dr. Christan Grant | UF Data Studio — GPA: 4.0
University of Central Florida(UCF) | Orlando, Florida — August 2021 - May 2025
Bachelor of Science in Computer Engineering — GPA: 3.99

PUBLICATIONS

1. **Evaluating LLM Social Cognition Through Multi-Agentic Strategic Games**
   *Authors: **Kevin Kurian**, Kevin Scroggins, Emannuel Dorley, Christan Grant. Accepted, 2026. ACM International Conference on Intelligent Virtual Agents.*
2. **Adversarial Mimicry and Masking in Isolation Forest Anomaly Detection Systems** *Authors: **Kevin Kurian**, Clarence Worrell. Accepted, 2026. Annual Modeling and Simulation Conference*
3. **Attacks and Defenses Against LLM Fingerprinting** *Authors: **Kevin Kurian**, Ethan Holland, Sean Oesch. Accepted, 2026. Workshop, Cyber Security Exp. & Test.*
4. **RISE-NLP: Interactive Residual Distribution Diagnostics for Fairness Auditing in Text Classification** *Authors: Ray Chen, **Kevin Kurian**, Christan Grant Accepted, 2026. Empirical Methods in Natural Language Processing: System Demonstrations (EMNLP)*
5. **Context-Switching Costs in Hybrid LLM-Algorithm Systems** *Authors: Kevin Scroggins, Kweku Yamoah, **Kevin Kurian**, Emmanuel Dorley. Accepted, 2026. Workshop, Autonomous Agents and Multiagent Systems.*
6. **Living Off the LLM: How LLMs Will Change Adversary Tactics** *Authors: Sean Oesch, Jack Hutchins, **Kevin Kurian**, Luke Koch. Accepted, 2025. IEEE Symp.- Security & Privacy*
7. **FATHOMS-RAG: A Framework for the Assessment of Thinking and Observation in Multimodal System that use Retrieval Augmented Generation** *Authors: Samuel Hildebrand, **Kevin Kurian**, et al. Accepted, 2025. SAFE-ML Workshop*

EXPERIENCE

Pacific Northwest National Laboratory — Seattle, WA
Applied AI Intern — May 2026 - Present
- Evaluating multi-agent systems in feedback loops, found hallucination rates to be **2.22x** faster as collaboration is reduced in research systems.

Oak Ridge National Laboratory — Oak Ridge, TN
AI Security Intern — Cyber Resilience & Intelligence Division — June 2025 - Aug 2025
- Engineered a novel RL-based LLM fingerprinting attack achieving **93.89%** accuracy in 3 queries (+14.2% baseline); developed defensive obfuscation filters and curated a **33,000+** query dataset across 9 open-source models.

Software Engineering Institute(SEI) | **Carnegie Mellon University** — Pittsburgh, PA
Data Science Research Intern — CERT Division — May 2024 - Aug 2024
- Exposed "boiling frog" data poisoning in iForest systems, detecting attacks in network traffic at **17%** contamination.
- Evaluated ensemble deepfake detection and outlier models against GAN/Diffusion data, presenting to **50+** CERT staff.

Lockheed Martin — Orlando, FL
Applied Research Systems Engineering Intern — Dec 2022 - May 2025
- Engineered defense ML pipelines, **fine-tuning scale-invariant** YOLO in PyTorch/TF for military object detection.
- Augmented training data using Pix2Pix, CycleGAN, and Stable Diffusion for **synthetic image generation.**

University of Central Florida — Orlando, FL
Undergraduate Applied Research Assistant — Nov 2021 - Jan 2025
- **HENAT Lab:** Optimized **115** PV systems via a digital twin; engineered a WLS-CUSUM model for multivariate time-series anomaly detection, achieving a **0.919** F1-score.
- **Analytics Decision & Control Lab:** Built Telegram/SVM pipelines to quantify media bias; fine-tuned T5/DistilBERT on news data, identifying **66%** bias retention and systemic dampening.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, Java, MATLAB, Gleam
AI Frameworks & Libraries: PyTorch, Hugging Face Transformers, LangChain, Ollama, TensorFlow/Keras, Scikit-learn, Gymnasium, OpenCV
Core Competencies: Large Language Models (LLMs), Multi-Agent Systems, RAG, Model Fine-Tuning, Adversarial ML, Reinforcement Learning

PROJECTS

Distributed Reddit Clone Engine — Orlando, FL
Sole Developer — December 2025
- Created a high-concurrency **Gleam** social engine via the Actor Model for distributed subreddits; engineered a Zipf-distributed simulator scaling to **100,000** concurrent users, message passing achieved **0.113ms** latency, **1,100+ ops/sec**.

Automatic Mixer - Senior Design — Orlando, FL
AI/ML Engineer — Aug 2024 - May 2025
- Led integration of a ML audio model with hardware to automate audio mixing for a low-cost digital audio mixer.

RELEVANT COURSEWORK

Adv. Data Structures, Distributed OS, Analysis Algorithms, Adv. AI, Network Optimization., Comp. Understanding of Natural Language.
